

Andreas Ulvstranden

Senior Software Architect

Sweden · +46 704 459 077 · andreas@ulvstranden.com

PROFILE

Senior Software Architect with a strong focus on long-term maintainability, and business value. I help organizations design and evolve systems that are robust, scalable, and aligned with real customer and business needs. With extensive experience across e-commerce, integrations, and business-critical platforms, I bridge the gap between strategy and implementation, combining architectural clarity with hands-on .NET expertise.

I am comfortable taking overall technical responsibility, guiding teams, and making pragmatic architectural decisions that stand the test of time. While not being afraid of getting my hands busy digging into code either.

CORE SKILLS

- Software Architecture & System Design
- .NET / C# / Backend Platforms
- Distributed Systems & Integrations
- AI integration & LLM-powered features
- AI-augmented engineering practice
- E-commerce & Business-Critical Systems
- Technical Leadership & Architecture Governance
- Mentoring Developers
- Agile, Iterative & Evolutionary Development

PROFESSIONAL EXPERIENCE

Danielson Ulvstranden AB — Founder and CEO

2014 – Present

Independent consultant working as software architect, senior developer, and technical leader, with end-to-end responsibility from architecture and design to implementation and delivery.

- ✓ CTO and Senior Software Developer — bonuscard.com
2014 – Present
Overall architectural and technical responsibility for a loyalty platform serving both physical retail and e-commerce. Focus on scalability, integrations, data flows, long-term platform evolution, and the ongoing integration of AI-powered features directly into the live system.
- ✓ Solution Architect and Senior Software Developer — Roima Parttrap One
2022 – 2026
Architectural work and development of enterprise-grade B2B systems for industrial and manufacturing customers.
- ✓ Solution Architect and Senior Software Developer — Mätorit
2021 – 2022
Architectural improvements, backend development, and system modernization in a data-driven environment.
- ✓ Senior Software Developer — Recopart
2017 – 2021
Architecture, design, and development of business-critical systems. Both ERP and e-commerce.

Recopart — Solution Architect and Senior Software Developer

2014 – 2017

Technical lead responsible for e-commerce platforms, ERP systems, and production and internal business systems.

NetOnNet — Solution Architect and Senior Software Developer

2007 – 2014

Technical leadership for large-scale e-commerce solutions, integrations, and backend systems supporting high-volume retail operations.

FDT — Software Developer

2006 – 2007

Development of Point-of-Sale systems and multiple payment integrations.

EDUCATION

Luleå University of Technology

Astrophysics and Space Engineering (2005 – 2006)

Mid Sweden University

Bachelor of Science in Computer Science (2001 – 2005)

Kiruna Institute for Space Physics

Space Engineering (2000 – 2001)

PERSONAL INTERESTS

- Playing board games
- Staying in shape
- Spending quality time with friends and family.
